**Garry Tan**   @garrytan · Mar 12

My CTO friend texted me: "Your **gstack** is crazy. This is like god mode. Your eng review discovered a subtle cross site scripting attack that I don't even think my team is aware of. I will make a bet that over 90% of new repos from today forward will use **gstack**."

**Garry Tan**   @garrytan · Mar 12

Replying to @garrytan

gstack is available now at [github.com/garrytan/gstack](https://github.com/garrytan/gstack)

Open source, MIT license, let me know if it works for you. It's just one paste to install it on your local Claude Code, and it's a 2nd one to insta...

**just kidding**  
**sorry everyone**

**Let's talk about...**

# **Cursor vs Claude Code vs Codex vs Conductor**

**why do they all start with "C"**

**Let's *actually* talk about...**

# **Coding Agents at YC**

## **and what we've seen over the past year**

**March 2025:  
25% of the time,  
it works 95% of the time**

**Dario March 2025:**

**"In one year, AI will be writing 100% of code"**

**March 2026:  
99% of the time  
it works 99% of the time**

**Krishiv**

@KrishivThakuria

YC just dropped a new application question for the Spring 2026 batch

"Attach a coding agent session you're particularly proud of"

**Optional: attach a coding agent session you're particularly proud of.**

This is an experimental question for the Spring 2026 batch to give people a chance to show off their skills with AI coding tools.

Many coding agents (i.e. Claude Code, Cursor, etc) have a `/export` command, or otherwise include a button allowing you to export a transcript. Can be text or markdown.

Click or drag to upload a .md or .txt file

**let's talk about...**

**November 24, 2025**

# The YC Agent

# ✦ YC Agent

Which YC founders  
went to my school?

Companies that took  
money from Accel

Top posts about  
technical recruiting

Ask anything...

**November 20: First PR**

**November 27: Thanksgiving**

**December 1: Hard launch event**

**November 20: First PR**

***November 24: Claude Opus 4.5***

**November 27: Thanksgiving**

**December 1: Hard launch event**

**November 20: First PR**

***November 24: Claude Opus 4.5***

**November 25: Holy shit**

**November 27: Thanksgiving**

**December 1: Hard launch event**

**November 20: First PR**

***November 24: Claude Opus 4.5***

**November 25: Holy shit**

**November 26: Let's expand scope**

**November 27: Thanksgiving**

**December 1: Hard launch event**

Thanks to Opus 4.5

**We basically doubled scope last minute  
and made it anyway**

### It's great for things like:

- Finding founders to meet: "Which YC founders went to my school?"
- Finding deals: "I need to setup banking for my startup, what's the best deal?"
- Learning user acquisition tips: "Give me the best tips from the forum on how to get more customers from LinkedIn"
- Finding potential customers: "My ideal customers are post-series A startups that are looking to hire quickly now. Who are 10 good potential customers for my product, and explain your thinking?"
- Finding experts to help: "Show me YC founders who have experience scaling AWS and explain your reasoning for each one"
- Getting intros to investors: "Show me companies who took money from Accel"

Then everyone asked us:  
**Why Opus 4.5?**

Btw been hearing great things about the bookface chatbot

Another founder told me ("you should do whatever they did for the bookface chatbot for your chatbot")

1 Reply

# building blocks

- RubyLLM
- Langfuse + LiteLLM
- Algolia indexes as tools
- A lot of glue code
- Opus 4.5
